REVALIDATIETECHNIEK

'ADL STANDARD'

PURPOSE

'ADL Standard' is a supply that enables positioning of aids and objects very close to the user. The adjustable standard allows for accessories such as a cup holder, smoking aid or minitable to be positioned accurately in the proximity of the user. Despite a limited arm or hand function the user is still able to eat, drink, smoke or grab objects.

FOR WHOM

'ADL Standard' is for users with limited arm or hand function that have the ability to pick up things, i.e. bread or a remote control, if they are placed in a favorable position. In some cases total lack of hand function doesn't pose a problem – the cup with straw and the smoking aid can be positioned close to the user's mouth. It often concerns mobility impaired users who like to have the before-mentioned objects close to their chair or wheelchair.

USE

'ADL Standard's accessories can be adjusted at the right height and angle. The standard can be mounted on a (movable) undercarriage as well as on a table. This guarantees deployment that fits any use.

CHARACTERISTICS

At this moment we offer accessories like a cup holder, a smoking aid and a mini table. New accessories will be added in the future and we can offer individual adaptations.

Other characteristics:

- Modular series of accessories for daily use which are interchangeable
- Adjustable height and angle
- Choice of undercarriages
- Much attention given to detail and functionality

Creating solutions together!
